Messages can be sent to limited quantity which are known to you, No random numbers allowed.
- + Package includes after Sale Support & Service along with Panel Training

IMPORTANT PUBLIC AWARENESS INFORMATION:

Over the years, We have found that many new as well as few established companies are selling SMS at a very cheap cost which is below the Operators Standard Pricing. This kind of Companies fool normal customers by cheap pricing strategy.

The fraud trap behind these companies is, They have **Delivery Cut Off System** which means when you bought 1 lakh SMS at 3 or 5 paisa and you send 1 lakh SMS they will submit only 50% or less to the Telecom Operator for delivery and they also update fake delivery reports which you cannot challenge as normal customer you can't check sms delivery by calling each person. Also this companies don't pick your Calls once payment is done to them. They give no support at all. But our is genuine Company and we provide you complete support and hand holding after sale service.

In this case we request you to stay away from those companies and don't compare them with us on just pricing parameter. We are a genuine Company and always committed to provide value for money services to our Customers with competitive & lowest possible best price.
